

Motions

Motion number	To be completed by EFA Secretariat
Name of the person introducing the Motion to the GA	Ana Miranda
Member party	BNG
Title (of the Motion)	Speculation with the electricity prizes in Spain
<p><i>a) Considering that the electricity is a common good and that the energy production should be in benefice of the european People and communities and not in benefice of the big multinationals and private energy enterprises;</i></p> <p><i>b) Considering that there are different situations in different european Nations and that there are in the spanish State a high increase of electricity prices in the last and current year and that the citizens are suffering the scandal of the payment of social and environmental consequences in the energy production. The rise in electricity prices is a scam and the electricity producing countries are not being benefited in the electricity bill and that the citizens of the producing areas pay the highest price of electricity. Already in the second quarter of last year, Spanish State was the fifth EU country that paid the most for electricity and electricity will be one of the most expensive in the continent consequence of the centralisation and speculation.</i></p> <p><i>The European Free Alliance calls for:</i></p> <ol style="list-style-type: none"> <i>1. Avoid discrimination in the prize of electricity in the different territories in Europe.</i> <i>2. Respect for the energetic souveragnity of the different nations in Europe to adopt the political measures, as the fair tarification and reducing of prize, the non appllication of costs to the citizens and industries and the political decissions according to every situation in every Nation .</i> <p><i>Reasoning: Dennounce the system of electricity prizes in Europe and the high increase of the electricity in Spain and the respect for the development of energetic souveragnity in every country.</i></p>
